

Magnetic Graphic Hanging Kit Instructions for the Eurostyle Pop Up System

Insert magnet into hole in each graphic hanging strip or graphic hanging square as shown.

Remove the backing paper to reveal the self adhesive strip. Magnet will tend to drop out when you turn the strip over to affix, so gently bend the strip's edges up and slide the magnet into position underneath before finally affixing to rear of graphic panel.

On the main panels the graphic hanging rail attaches directly to the top edge of the graphic. Ensure the triangular recess (a) is facing downwards as in the picture above.

For the end curve panels apply graphic hanging squares directly onto the top corners of the graphic. The triangle (a) should face downwards. If in doubt carefully study the picture above. It is important that the end curve fixings are exactly positioned the same way round as the front face graphic rail.

Pop Up 'Magnetic Style' Assembly Instructions

Ensure all components are available for assembly.

Position space frame with lamp fittings on top and towards you.

Open structure until magnetic locking bars snap together.

Place magnetic rails vertically into hubs and let snap into place.

Start at the top and continue downwards until all are positioned securely.

Slide halogen lamps onto fittings.

Locate the magnetic buttons on the back of the graphic into the top of the system.

Let the graphic's magnetic strips gently grab the side rails from top to bottom taking care not to crease the graphic.

Continue until all panels are in place. Taking the Pop Up down is the reverse of assembly.

Pop Up 'Hook Style' Assembly Instructions

1
Ensure all components are available for assembly.

2
Position space frame with lamp fittings on top and towards you.

3
Open structure until magnetic locking bars snap together.

4
Place magnetic rails vertically into hubs and let snap into place.

5
Start at the top and continue downwards until all are positioned securely.

6
Slide halogen lamps onto fittings.

7
Hook each blue graphic rail connector over the blue peg at the top of the structure.

8
Let the graphic's magnetic strips gently grab the side rails from top to bottom taking care not to crease the graphic.

9
Continue until all panels are in place. Taking the Pop Up down is the reverse of assembly.

Pop up graphics system/**Carry Case**

Heavy duty carry case

- Heavy duty moulded impact casing
- Carry case to counter in seconds
- Store halogen lamps within the lid
- 670mmW x 435mmD x 925mmH
- Nett weight 9.5kg

Carry Case Display Graphic Specification

1755mm x 735mm

 Visible graphic area
1755mm x 735mm

 Image bleed area
1775mm x 755mm
